As Seen on TV: NEC Provides Powerful Crime Solving Face Recognition Software to Law Enforcement

If you're a fan of any of the detective shows available on television and streaming services, you've probably seen an episode or two where a crucial part of solving the fictional crime is using face-recognition software to identify potential suspects. It's the digital version of an old-fashioned police lineup. The scenario usually involves detectives finding an old photo or obtaining …

Biometrics Enhances LPGA Fan Experience

Ladies Pro Golf Association (LPGA) founded in 1950 is a premier professional women's sports association that provides programs, instruction, tournament play, as well as charitable events through its foundation. Recently, at the ANA Inspiration Tournament in Palm Springs, California, the LPGA and NEC worked together to pilot a program that provided facial recognition solutions for safety and security of its …

Protecting critical infrastructure and the fan experience with biometric face recognition

From concert halls to sports stadiums, nothing ruins an outing like a public safety incident. Whether it's due to a fan's reaction to an unpopular ruling on the field or a more intentional plot to inflict harm, when situations get out of control, the outcome is unpredictable and often dangerous. Imagine a scuffle breaking out at a soccer match in …
